

## Resources

*“Psychologically, we were raised in a world that no longer really exists. We have a new world we have to navigate and we need a new psychology for that world. But how does that new psychology develop when all of our institutions for cultivating consciousness are set in the 19th and 20th century??”*

*~ Dr. Maureen O’Hara, International Futures Forum*

The context people and organizations have been operating in has shifted dramatically. Many are struggling to navigate the turbulence caused by the rising levels of volatility, uncertainty, complexity and ambiguity (VUCA) as the skills we have relied on (and spent a lifetime acquiring) are proving to be ineffective in these new conditions. Our new world is definitely different, but it becomes less difficult when you're oriented and fortified with relevant maps, guides, tools and companions. Laureen accompanies and guides purpose-driven leaders who are preparing their organization and people for this new world.

## Resources to Learn More About Our New World
